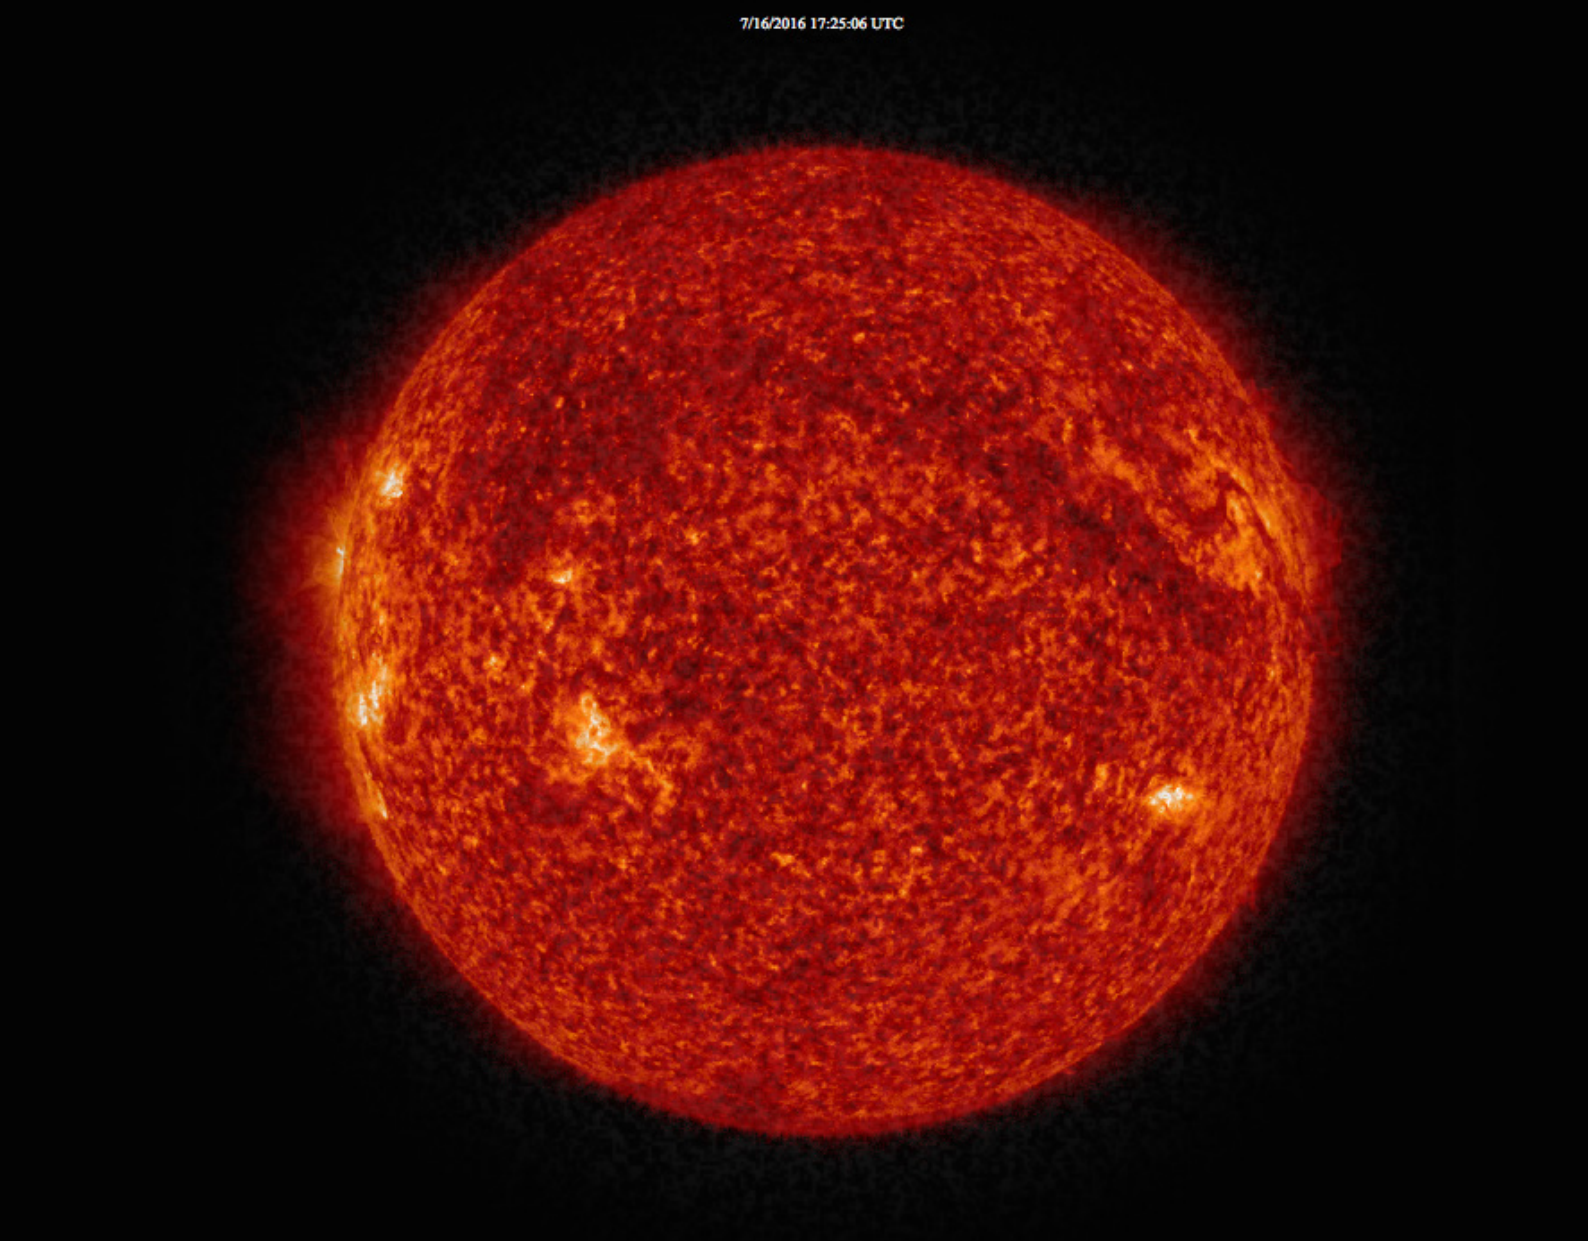
SUNSTREAM.TV

The sun live. (Placebo) Vitamine D!



screenshot of http://www.sunstream.tv/, the sun live at that moment, variable dimensions

An ongoing movie on internet of the last uploaded images of the SOHO-satelite.

Technical:

www.sunstream.tv is a live film from the sun composed out of real-time photographs taken by the SOHO satellite from NASA. This becomes a live movie by blending and filtering the second last photo and the last photo taken of the sun. This process will go on forever.

SORRY

People see the 3D-sun while sunbathing and using self-tanning sunscreen for both external and internal External: apply sunscreen before sunbathing. Works SOFTENING and HEALING. Internal: energy paste with cacao butter, sun powder and Vitamine D. Works ENERGIZING and STIMULATING. ***SMAK, Ghent(B)***

A hotspot is a physical location where people may obtain sunstream.tv access.
It would be fantastic to have hotspots all around the world.
